

Image Analysis for Remote Sensing Data

**A Special Track of the 4th International Symposium on
Visual Computing (ISVC08) www.isvc.net**

Scope:

The increase in the number of satellite and aircraft imageries is exponential. Many image processing and image analysis techniques are being developed to aid the interpretation of remote sensing images and to extract as much information as possible from the images. The track aims to bring together researchers and practitioners from image analysis, pattern recognition, remote sensing and related areas. In particular, papers submitted to this track should highlight the synergistic effects of integrating image analysis and remote sensing.

Topics:

Major topics of interest include, but are not limited to:

- Correction of distortions due to the characteristics of the imaging system
- Image georeferencing and geocoding
- Registration of image data to a map grid
- Image to image registration
- Interpretation of digital image data
- Radiometric and geometric enhancement techniques
- Multispectral transformations of image data
- Supervised classification techniques
- Unsupervised classification
- Hierarchical clustering
- Feature reduction and separability
- Data fusion
- Knowledge-based image analysis
- Hyperspectral image data
- Feature reduction and feature selection

Paper Submission Procedure:

Papers submitted to ISVC 2008 Special Track must not have been previously published and must not be currently under consideration for publication elsewhere. Manuscripts should be submitted in camera-ready format and should not exceed **12 pages**, including figures and tables (see <http://www.isvc.net> for details).

All papers accepted will appear in the symposium proceedings which will be published by **Springer-Verlag** in the **Lecture Notes in Computer Science (LNCS)** series.

Important Dates:

Paper submissions	July 21, 2008
Notification of acceptance	September 1, 2008
Final camera ready paper	September 15, 2008
Advance Registration	September 15, 2008
ISVC08 Symposium	December 1-3, 2008

Organizers:

Jose A. Malpica, Alcala University. Spain, josea.malpica@uah.es
Maria A. Sanz, Technical University of Madrid, Spain, asanz@upm.es
Maria C. Alonso, Alcala University, Spain, mconcepcion.alonso@uah.es

Committee:

Hossein Arefi, Stuttgart University of Applied Sciences, Germany
Mark.Berman, CSIRO, Australia
Manfred Ehlers, University of Osnabrueck, Germany
María J. García-Rodríguez, Technical University of Madrid, Spain
John L. van Genderen, ITC, The Netherlands
Radja Khedam, Technology and Sciences University, Algeria
José L. Lerma, Technical University of Valencia, Spain
Qingquan Li, Wuhan University, China
Dimitris Manolakis, MIT Lincoln Laboratory, USA
Farid Melgani, University of Trento, Italy
Jon Mills, University of Newcastle, UK
Francisco Papí, IGN, Spain
Karel Pavelka, Technical University in Prague, Czech Republic
Mohammad-Reza Saradjian, University of Tehran, Iran
Sriparna Saha, Indian Statistical Institute, India
