Best Practices in Teaching Visual Computing

A Special Track of the
6th International Symposium on Visual Computing (ISVC10)

http://www.isvc.net

Scope:

We witness a rapid expansion of multimedia industries exploiting visual information (such as video surveillance, biometrics, immersive computer games, 3D home entertainment and many others), which creates the need for engineers and computer scientists with strong visual computing skills. How do we teach visual computing? Image Processing, Computer Vision, Computer Graphics, and Virtual Reality are relatively new fields of engineering and computer science; however, they embrace a wide diversity of applications and theoretical challenges, which makes teaching of fundamental concepts related to these disciplines a challenging task. This special track welcomes contributions on innovative teaching techniques for Image Processing, Computer Vision, Computer Graphics, and Virtual Reality courses at the undergraduate and graduate level.

Topics:

The topics of interest include but are not limited to the following areas:

- innovative teaching methods in visual computing disciplines
- problem-based learning in visual computing disciplines
- academic-industrial partnerships
- visual computing for non EE-CS majors
- curriculum development for visual computing
- approaches for the evaluation of the learning experience in visual computing courses
- interdisciplinary teaching for visual computing
- "don't do this" case studies - examples of appealing ideas that did not work

Paper Submission Procedure:

Papers submitted to ISVC 2010 Special Track must not have been previously published and must not be currently under consideration for publication elsewhere. Manuscripts should be submitted in camera-ready format and should not exceed **12 pages**, including figures and tables (see http://www.isvc.net for details). All papers accepted will appear in the symposium proceedings which will be published by **Springer-Verlag** in the **Lecture Notes in Computer Science (LNCS)** series.

Important Dates:

Paper submissions	July 12, 2010
Notification of acceptance	August 31, 2010
Final camera ready paper	September 15, 2010
Advance Registration	September 15, 2010
ISVC09 Symposium	November 29 - December 1, 2010

Organizers:

Alexandra Branzan Albu, University of Victoria, BC, Canada, aalbu@uvic.ca
George Bebis, University of Reno, Nevada, bebis@cse.unr.edu

Committee:

Robert Bergevin, Laval University, Quebec, Canada
Roger Crawfis, Ohio State University, USA
Riad Hammoud, DynaVox Systems, USA
Ioannis Kakadiaris, University of Huston, USA
Denis Laurendeau, Laval University, Quebec, Canada
Bruce Maxwell, Colby College, USA
George Stockman, Michigan State University, USA
