

Object Recognition

A Special Track of the

8th International Symposium on Visual Computing (ISVC'12)

http://www.isvc.net

July 16-18, 2012, Crete, Greece

Scope:

Recognizing objects is one of the most useful tasks in vision. While this is an ability that comes naturally in humans, due to the significant variations exhibited by real-world images, this task continues to be particularly challenging for computer vision despite more than 20 years of research. Not even the most advanced systems can handle the full range of partial occlusions, viewpoint changes, varying illumination, cluttered backgrounds, and intra-category appearance.

In this special track, we are soliciting papers from the visual computing community that address this challenge by extending existing methodologies or introducing new techniques for object recognition.

Topics:

The topics of interest include but are not limited to the following areas:

- Object recognition using local features
- Graphical models for object recognition
- Hierarchical object representations
- Statistical learning methods for object recognition
- Semantic knowledge integration
- Biologically inspired neural network approaches

Paper Submission Procedure:

Papers submitted to ISVC 2012 Special Track must not have been previously published and must not be currently under consideration for publication elsewhere. Manuscripts should be submitted in cameraready format and should not exceed **12 pages**, including figures and tables (see <u>http://www.isvc.net</u> for details). All papers accepted will appear in the symposium proceedings which will be published by **Springer-Verlag** in the **Lecture Notes in Computer Science (LNCS)** series.

Important Dates:

Paper submissions	May 7, 2012 (Extended)
Notification of acceptance	June 4, 2012
Final camera ready paper	June 18, 2012
Advance Registration	June 18, 2012
ISVC'12 Symposium	July 16-18, 2012

Organizers:

Andrea Selinger Salgian, The College of New Jersey, USA, <u>salgian@tcnj.edu</u> Fabien Scalzo, University of California at Los Angeles, USA, <u>fscalzo@mednet.ucla.edu</u>
