Scope
The purpose of the International Symposium on Visual Computing (ISVC) is to provide a common forum for researchers, scientists, engineers and practitioners throughout the world to present their latest research findings, ideas, developments and applications in the broader area of visual computing. The symposium will consist of invited and contributed presentations dealing with all aspects of visual computing. The symposium will also include tutorials, keynote, special tracks, and poster sessions.

Topics
ISVC seeks papers contributing to the state of the art and practice in the four main areas of visual computing: computer vision, computer graphics, visualization and virtual reality. Of particular interest are papers that combine technologies from two or more areas.

Submission Procedure
This is a “double-blind” peer-reviewed symposium. Papers submitted to ISVC must not have been previously published and must not be currently under consideration for publication in another conference. At least one author of each accepted paper must complete the symposium registration and present the paper at the symposium, in order for the paper to be included in the proceedings and symposium program. Video or Skype presentations are not acceptable and any papers not presented at the symposium without a valid reason will be withdrawn from the proceedings. All papers accepted will appear in the symposium proceedings which will be published by Springer-Verlag in Lecture Notes in Computer Science (LNCS).
